COMMUNICATIONS RECEIVER

MODEL CR-44A  
DIRECTION FINDER  
PORTABLE RECEIVER

MODEL SR-400 CYCLONE II

Latest version of the Model SR-400. Precision built, compact, high performance transceiver. Designed for transmission and reception of single sideband (SSB) and continuous wave (CW) signals on the 80, 40, 20, 15, and 10 meter Amateur Bands.

Operates with the Model PS-500-A-AC power supply for fixed station and/or P-500-DC power supply for mobile operation.

MODEL CR-44A

Five-band direction finder portable receiver. Covers standard AM and FM broadcast, longwave navigation (185-400 kHz), marine and shortwave (2-5.2 MHz), and public safety, weather, police and fire (152-174 MHz) frequencies, with direct readout azimuth indicator and null meter.

Complimentary copies of the service data are enclosed. Additional copies can be obtained as follows:
